

## ✓ creating variables

```
#making salution
salute_world = ["hello world"]
```

```
print(salute_world)

['hello world']
```

## ✓ using simple mathematical funtion

```
#making addition
sum = 2 + 2
```

```
print(sum)

4
```

```
#using subtraction
bb = 24-10
print(bb)
```

```
⇒ 14
```

[+ Code](#)[+ Text](#)

```
#multiplication
musa = 34*62
```

```
print(musa)

2108
```

```
#using divission
bello = 20/2
```

```
print(bello)

10.0
```
